

We are seeking a skilled and motivated **Mechanical Engineer** to join our dynamic team at KK Wind Solutions. As a Mechanical Engineer, you will play a crucial role in the design, development, and implementation of mechanical systems and components for our innovative projects. You will work closely with cross-functional teams to ensure the successful execution of projects and contribute to the continuous improvement of our engineering processes.

Key Responsibilities:

- Conduct technical analysis and assessments of mechanical components and processes.
- Review and validate mechanical designs to ensure compliance with industry and customer standards.
- Prepare technical documentation, reports, and recommendations for improvements.
- Collaborate with project teams to provide engineering insights and recommendations.
- Identify potential mechanical failures or inefficiencies and propose mitigation strategies.
- Participate in prototype testing and troubleshooting.
- Support the development of mechanical solutions for customer projects.

Qualifications:

- A degree in Mechanical Engineering or a related field.
- Experience in mechanical design.
- Proficiency in SolidWorks.
- Knowledge of D-FMEA analysis and facilitation skills.
- Practical experience with mechanical solutions in cabinets.
- Strong problem-solving and analytical skills.
- Ability to work independently and collaboratively with cross-functional teams.
- Excellent communication and documentation skills.

This position is also open to recent graduates or students completing their studies.
